

CYBERSECURITY INCIDENT

MANDATORY NOTIFICATION CONTACTS

Water Treatment Facility | Notify ALL three contacts immediately upon confirmed or suspected incident

1. TCEQ — Texas Commission on Environmental Quality

Phone	(512) 965-2371
After Hours	
Online / Email	Leticia.deleon@tceq.texas.gov
When to Call	Immediately upon any confirmed or suspected cybersecurity incident affecting water system operations, SCADA, or reporting capability
Reference	Texas Water Code — mandatory immediate notification requirement
Notes	Document time of call, name of person you spoke with, and what was reported

2. Texas DIR — Texas Department of Information Resources — Cybersecurity

Phone	(877) DIR-CISO
Email / Portal	
When to Call	Incidents affecting critical infrastructure control systems, SCADA, or OT networks — notify in parallel with TCEQ
Reference	Texas critical infrastructure cybersecurity reporting framework
Notes	They coordinate with federal CISA — your report may escalate automatically

3. CISA — Cybersecurity & Infrastructure Security Agency (Federal)

Phone	1-888-282-0870
Email	central@cisa.dhs.gov
Online	www.cisa.gov/report
When to Call	Federal reporting for critical infrastructure incidents — water systems are covered under 16 critical infrastructure sectors
Reference	CISA ICS-CERT incident reporting — Water & Wastewater Sector
Notes	CISA does not replace TCEQ reporting — both are required. CISA can provide technical assistance during active incidents

IN ALL CASES — DOCUMENT EVERYTHING

Record: date/time of discovery | what was observed | who was notified and when | name of contact person reached | any actions taken

If unsure whether an incident is real — report anyway. Regulatory agencies would rather receive a false alarm than a missed report.

Prepared: April 24, 2026 | Review annually or after any incident
